

Souvik Chatterjee

+91-8240495275 — souvikchatterjee080@gmail.com — www.linkedin.com/souvik — <https://github.com>

Technical Skills

Programming Languages: Python, Java, SQL

Machine Learning: Scikit-Learn, XGBoost, Random Forest, SVM, Clustering, Feature Engineering

Deep Learning: PyTorch, TensorFlow, Keras, Transformers, Large Language Models (LLMs)

Artificial Intelligence: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Prompt Engineering, Hugging Face

Computer Vision: CNNs, VGG-19, Neural Style Transfer (AdaIN)

Data Analysis: NumPy, Pandas

Backend Frameworks: FastAPI, Streamlit

Databases: MongoDB, MySQL

Tools Platforms: Git, GitHub, Linux

Projects

AI Doctor: Multimodal Medical Assistant

Live Demo

- Built a multimodal healthcare assistant integrating medical image analysis, speech recognition, and LLM-based reasoning.
- Implemented Llama Vision and Whisper models for image understanding and voice interaction.
- Deployed the application on Hugging Face Spaces for real-time inference.

SafeSpace AI Agent

Live Demo

- Developed an AI-powered conversational assistant using LangChain, FastAPI, and Large Language Models.
- Designed memory-aware workflows enabling contextual and multi-turn conversations.
- Built backend APIs and deployed the application using Streamlit and Render.

Neural Style Transfer using AdaIN

GitHub

- Built a Neural Style Transfer application using AdaIN and pretrained VGG-19 architecture.
- Implemented real-time artistic image stylization with adjustable style intensity.
- Developed image upload and inference functionality using PyTorch.

Education

Master of Computer Applications (MCA)

2024 – 2026

University of Kalyani

Bachelor of Science

2020 – 2023

Asutosh College

CGPA: 7.9

Certifications

- Agentic AI Engineering with LangChain and LangGraph
- The Bits and Bytes of Computer Networking
